

Process Certificate

Awarded to

Vermeulen sloop- en milieutechnieken

Boezemweg 17, 2641 KG, Pijnacker, The Netherlands

The Dutch Asbestos Authority, acting under the name dNAA, declares that the Process Management System of the above-mentioned organisation has been assessed and found to be in accordance with the requirements of the Certification Scheme for the Process Certificates for Asbestos Inventory and Asbestos Removal part:

Asbestos Removal

Date of first certificate:	04-07-2007	E-mail:	info@vermeulen-bv.com
Start date certificate:	07-10-2021	Contact:	Dhr. R. Hoogland
Certificate valid until:	07-10-2024	Chamber of Commerce registration:	27309641
CB certificate number:	2020045-1.1	SCA-code:	15-C202045.01
		Telephone:	071-5899354

dNAA declares that there is justified confidence that the process of:

1. removing asbestos or asbestos-containing products, classified as risk class 2 or 2A; and
2. clean-up of asbestos or asbestos-containing products, classified as risk class 2 or 2A, which were released in consequence of an incident,

will be performed in compliance with the requirements for asbestos removal stated in the current version of the area-specific certification standard 'Process Certificates for Asbestos Inventory and Asbestos Removal'.

Obligations of the Certificate Holder:

1. In case of supervision by CI, ISZW, RUD, and/or Municipality, the client must grant the supervisor access to the project location;
2. Assessments by the Certification Body at the project location are always unannounced;
3. The contractor will provide the asbestos removal company with the complete asbestos inventory report, in accordance with the Certification Scheme for Asbestos Inventory Process Certificates, in compliance with the requirements stated in Article 4.54a of the Asbestos Removal Decree;
4. Before the start of the asbestos removal work, the contractor makes a copy of the complete demolition notification, demolition permit or environmental permit available to the asbestos removal company in compliance with the requirements stated in Article 10, paragraph 14.54a of the Asbestos Removal Decree;
5. The contractor (or the certificate holder on behalf of the contractor) ensures that a final assessment body is commissioned to carry out the final assessment after the asbestos removal work has been completed;
6. The contractor makes the findings of the inspection available in writing to the asbestos removal company;
7. If the asbestos or asbestos-containing products released during the removal of asbestos is not removed directly to the designated landfill site, it must be stored in an interim storage facility. The interim storage must comply with the requirements stated in the Environmental Management Act. If the total contents of the interim storage are deposited at the designated landfill site, a copy of the relevant part of the interim storage project register must be sent to the contractor of the asbestos removal work together with the deposit certificate;
8. In case of complaints, the certificate holder must be contacted and, in case of serious complaints, the Certification Body;
9. The certificate holder returns an invalidated process certificate to the certification body within fourteen days of a registered request to do so;
10. The certificate holder will inform dNAA of any changes as referred to in Article 4, paragraph 2 of the area-specific certification standard 'Process Certificates for Asbestos Inventory and Asbestos Removal';
11. During the term of the process certificate, the certificate holder continues to comply with the relevant requirements from the Certification Scheme for Process Certificates Asbestos Inventory.
